

# Category Management 2023

*The immobilienmanager Award 2023 in the Management category goes to the Arminius Group.*

With its ESG scoring model, the Arminius Group has identified an extremely comprehensive number of indicators - and defined individual characteristics for each of these 154 indicators. These are based on the requirements of the Sustainable Development Goals, the EU taxonomy, the ethical guidelines of the Protestant Church and other pragmatic approaches.

Our [jury](#) considers the holistic approach, which is oriented toward the life cycle of the property, to be an outstanding achievement. The model provides comprehensible and transparent ESG key figures - from purchase through the entire holding period of a property.

Arminius is currently examining whether the scoring model can also be made available to other portfolio holders. In addition, an extension to other types of use is planned.
